**OFFICE OF STUDENT AFFAIRS
CAREER SERVICES OFFICE**

INTRODUCTION

The Career Services Office is pleased to present the results of the Class of 2014 Graduating Student Survey. The following data are representative of the post-graduation activities of degree recipients from December 2013, May 2014, and August 2014. This report is based on the responses from 393 out of 547 ESF degree recipients, representing an overall response rate of **71.8 percent**.

More specifically, the responses by degree level are as follows:

Associate degree level:

- 46 degree recipients with 27 respondents, representing a 58.7 percent response rate.

Undergraduate degree level:

- 374 degree recipients with 276 respondents, representing an 73.8 percent response rate.

Graduate degree level:

- 127 total degree recipients with 90 respondents, representing a 70.9 percent response rate.

The 2014 Graduating Student Survey was administered in the following ways:

December 2013 Graduates

- The survey was highlighted in the Career Services newsletter.
- The survey link was e-mailed to all December graduates.
- A handout was given during a presentation made to all attendees at the annual convocation rehearsal.

May 2014 Graduates

- Information was included with convocation materials.
- A table was staffed during cap and gown pick-up to have graduates complete the survey.
- A handout was given during a presentation made to all attendees at the annual convocation rehearsal
- The survey link was e-mailed to all May graduates.

August 2014 Graduates

- The survey link was e-mailed to all August graduates.

The above identified strategies, targeting students prior to graduation, proved valuable in obtaining accurate contact information. The following additional steps were taken to gather information from non-responders, those who indicated they were not employed, and those who were not continuing their education:

- Multiple e-mails were sent throughout the year.
- Phone calls were made.
- Connections made through LinkedIn.
- Reached out to faculty and staff to assist with post-graduation activity for those they stay in contact with.

Below are summary highlights from the data collected. Please note that these statistics are representative of the 393 respondents. To add greater transparency to the summary highlights and the post-graduation activity of the graduates, individual components of these data are categorized for your reference.

- The overall number of associate, undergraduate, and graduate degree recipients employed full-time, part-time, or attending graduate school was **91.1 percent**.

	Associate Degree	Undergraduate Degree	Graduate Degree
Employed Full-Time	1	155	72
Employed Part-Time	0	40	7
Continuing Education	26	50	7

- For the Class of 2014 (393 respondents), 21.1 percent reported they are continuing their studies full-time.
- For the Class of 2014 (393 respondents), 58 percent of associate, undergraduate, and graduate degree recipients reported being employed full-time, while 10.9 percent reported being employed part-time.
- For those employed full-time, 85.1 percent indicated their position was related to their ESF major. For those employed part-time, 72.3 percent indicated their position was related to their ESF major.
- The average full-time salary for SUNY-ESF undergraduates in 2014 was \$40,216.
- For employed undergraduates, 89.9 percent reported they found their position within six months following graduation.
- For undergraduate respondents, 70.9 percent indicated they participated in a student club or organization during their time at ESF.
- For graduate students, 71.4 percent indicated they participated in research projects with faculty while at ESF.
- The most effective method by which 2014 graduates found employment was through networking. 47.4 percent of all graduate respondents reported they obtained their position through personal contacts and networking or by applying directly to the organization.
- A complete list of full-time and part-time employers within the field of study for the Class of 2014 can be found on page 51.
- For undergraduate respondents, 58.3 percent identified full-time or part-time employment within their field of major found employment in New York State. For graduate students, 47.1 percent identified the same.
- Within New York State, 51.6 percent of undergraduates along with 50 percent of graduates found employment within their field of major in Central New York. Employment Geographic Summary can be found on page 54.
- A complete list of graduate schools currently being attended by the Class of 2014 can be found on page 55.
- New this year is an “Internship Summary” which breaks down respondents by department and organizes their reported participation. This information can be found on page 56.

- Listed below is a sub-set of comparison statistics from 2010-2014.
